Roller Joystick – 5 Button	\$523.00
BigTrack Trackball	\$108.00
BigTrack Trackball, Switch Adapted	\$132.00

Aroga carries a wide variety of switches, which come in a variety of shapes and sizes depending on the action used to activate them (such as sip-puff, pushing, pulling or squeezing). Switches also vary in their colour and aesthetics and, for push switches, the amount of force required to operate them. A switch can be operated by any suitable body part that is able to produce consistent and voluntary movement. Switches can be suitable for people with cognitive difficulties and developmental delays as they are a clear and simple tool to demonstrate action/reaction.

Buddy Button (please specify colour; green, blue, red or yellow)	\$69.00
Big Buddy Button (please specify colour; green, blue, red or yellow)	\$69.00

### **Computer Screen Magnification Software**

Screen magnification software is used by people with visual disabilities to access information on a computer's screen. The software enlarges the information on the screen by pre-determined incremental factor. Magnification programs run simultaneously and seamlessly with the computer's operating system and applications. Most screen magnification software has the flexibility to magnify the full screen, parts of the screen or provide a magnifying glass view of the area around the cursor or pointer.

<b>Zoomtext Magnifier</b>	<b>\$352.00</b>
<b>Zoomtext Magnifier/Reader</b>	<b>\$522.00</b>
<b>Zoomtext Magnifier/Reader International</b>	<b>\$755.00</b>
<b>Zoomtext Magnifier/Reader USB</b>	<b>\$608.00</b>
<b>Zoomtext Express – On CD</b>	<b>\$63.00</b>
<b>Magic</b>	<b>\$631.00</b>

<b>Large Print Keyboards and Stickers</b>	
These keyboards have all the features and buttons of standard QWERTY keyboards, but these come in a variety of sizes and colours, for people with visual impairments.	
Zoomtext Keyboard	\$100.00
Wireless Large Print Multimedia Keyboard	\$114.00
Large Print Stickers	\$14.00
Braille Stickers	\$15.00
<b>Scanning and Reading Systems</b>	
Scanning and Reading Systems are designed to make printed documents accessible to blind and visually impaired users without a computer.	
SARA (Scanning and Reading Appliance)	\$2,968.00
KNFB Reading (refurbished)	\$1,273.00
<b>Screen Reading Software</b>	
A screen reader is a software application that attempts to identify and interpret what is being displayed on the screen. This interpretation is then represented to the user with text-to-speech, sound icons, or a Braille output.	
JAWS Pro	\$1,153.00
JAWS site licenses are available for 5 or more copies, please contact Aroga for more information.	
Stand Alone – System Access	\$479.00
Document Scan – Scanning Software – Add on for System Access	\$191.00
System Access Public Access License (PAL) – Includes 5 Seat System Access	\$1,673.00
ALVA BC640 – Braille option for system access	\$4555.00
<b>Focus Braille Displays</b>	
Based on features rated most desirable by Braille display users, Focus Braille Displays are packed with advanced features and options that can be easily configured through JAWS.	
Focus 40	\$4,165.00
Focus 80	\$8,240.00
<b>Scanning Software</b>	
Specially designed software packages that make printed text readily available to people who are blind or visually impaired through voice output. Requires compatible scanner, please contact Aroga for a list of compatible scanners.	
Kurzweil 1000	\$1,040.00
Openbook	\$1,040.00
Eclipse writer Pro	\$621.00
Ability to scan then convert to daisy book which can then be played on a DAISY book reader
